Vote for unity, not division.

European elections 9 June.

In times of war and crisis, we need to come together. Yet we know that right-wing populists and authoritarian movements are trying to pull us apart. We must increase solidarity in Europe and secure support for Ukraine. Ultimately, it is about the safety and security of the Swedish people. About defending our democracy and our way of life.

On June 9, you have a choice: vote for unity, not division. This is not a trivial thing.

If you cannot vote in person on June 9, you can vote early starting on May 22. Read more on val.se
